WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

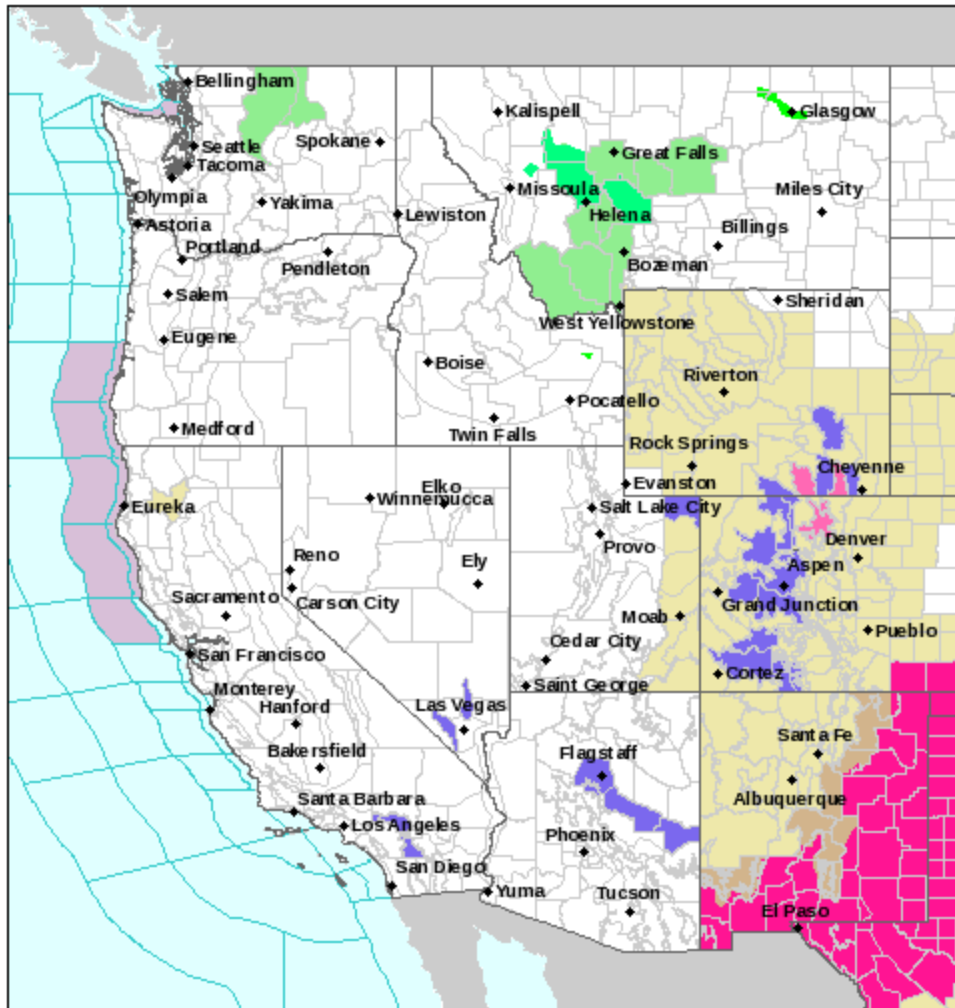

A high pressure ridge will bring warmer, drier weather to the region over the next few days. A few afternoon showers are possible today from Lake Tahoe southward along the Sierra. Temperatures will be about 5 degrees warmer today, with the warmest areas being the inland valleys around the mid 80s, 10 degrees above normal. Winds will be lighter than the past few days, with afternoon winds becoming southerly to westerly Thursday through the weekend. An ongoing drying trend with warm temperatures will continue. There is a small chance of some mountain showers in the north this weekend as a weak weather system moves through the region. However, cooler temperatures are not expected. Warmest areas are expected to be around the 90s early next week as high pressure returns over the region.

SOUTHERN CALIFORNIA

The area of low pressure that was over Southern California yesterday is now over Arizona. Moisture on the back side of the low will bring scattered showers and isolated thunderstorms to the Sierra and Southern California through this afternoon. Most locations will receive less than a quarter inch of additional rainfall. The snow level will be around 7,000 feet. Temperatures will remain well below normal today, with upper 40s and 50s across the mountains and 60s to low 70s in the valleys. A ridge of high pressure will build into California from the Pacific Ocean bringing substantial warming and drying to the region Thursday and Friday. Temperatures will be near normal Thursday and then 10 to 15 degrees above normal Friday. Minimum humidity will still be mainly above 30% Thursday and then be between 15% and 30% Friday. There will be little change in temperature Saturday as the ridge remains in place and then temperatures will gradually cool Sunday through early next week as the ridge of high pressure weakens a little. Minimum humidity will be mainly in the teens above and inland from the marine layer Saturday through early next week. No significant winds are anticipated across the region through early next week.

Cal OES LAW ENFORCEMENT MISSIONS

New/Closed Cal OES Law Missions

- **2018-LAW-46408, 05/01/18, 1350 hours:** The IERCC reported an inReach activation at coordinates 41 23' 26" N, 122 12' 22" W, which plotted to the southwest slope of Mount Shasta. The registered owner (R/O) was a 23 year old male, who planned to ski Mt. Shasta with a female wilderness guide. Siskiyou County Sheriff's Office was notified and initiated a SAR deployment. Updated coordinates over the following 1 ½ hours indicated the device was moving downhill and stopped at a trailhead at the base of the mountain. At 1510 hours, the R/O contacted IERCC, indicated the activation was accidental, and he was not in distress. Siskiyou Sheriff was notified and demobilized.
Mission Closed.

Cal OES MISSION TASKING

Cal OES Missions

- **2018-IREOC-45244:** Caltrans to remove dead and dying trees along highways in Kern, Tulare, Fresno, Madera, Mariposa, Tuolumne, Calaveras, Butte, Plumas, Sierra, Shasta, and Lassen counties. (On Scene – Long-term assignment)
- **2017-SOC-44098:** CalRecycle Debris Management Team in Ventura County (Coordinating)
- **2017-SOC-43821:** DTSC to remove household hazardous waste from over 500 residential lots in Ventura County (On Scene)
- **2017-Inland-42559:** Weather station installed to gather real time rainfall data by Air Resources Control Board (On Scene)
